

Amendments to the Drawings

Figure 3 of the formal drawings submitted January 2, 2003 has been amended to replace "30" with "40" for consistency with the paragraph at page 15, lines 5-12 of the specification.

Figure 4 of the formal drawings submitted January 2, 2003 has been amended to replace "50" with "60", "51" with "61", "52" with "62", "53" with "63", and "54" with "64" to remove the duplication of numerals with Figure 5 and consistency with the amended paragraph at page 16, lines 8-14 of the specification.

REMARKS

In paragraph 6 of the Notice of Allowance mailed February 3, 2006, the Examiner requested new corrected drawings to "replace the hand-drawn figures." Applicant's attorney called Examiner Lin. It was noted that formal drawings had been provided in January, 2003. Examiner Lin acknowledged the receipt of those drawings, and clarified that what was actually being requested was to provide different reference numerals in either Figure 4 or 5 as they both use the same numerals. Applicant notes that Figure 3 also duplicates use of the numeral "30".

Accompanying this Amendment is a **Letter to the Draftsperson** and a **Set of Formal Drawings**. To clear up any confusion by the typographical errors of the use of duplicate numerals, Applicant has amended the description of Figure 4 in the specification for consistency with Figure 4's new numbering scheme, and has amended Figure 3 for consistency with Figure 3's numbering scheme in its description in the specification.

Please also consider the accompanying **Information Disclosure Statement**.

Conclusion

In light of the remarks presented above, please enter these amendments to the specification and drawings and issue this application as a patent.

Date: *May 3, 2006*
